

SIGNIFICANT EVENT NOTICE

Discontinuation of Support for the Legacy Token (LGCT)

Legacy Network AG – 23.12.2025

Description of the Event

Legacy Network AG hereby informs that full support for the Legacy Token (LGCT) will be discontinued as of 31.12.2025. All token-based functionalities and utilities within the Legacy ecosystem will be permanently deactivated from that date. As a result, LGCT will no longer have any utility or use case within the Legacy ecosystem.

Affected Functions

- In-Legacy app token uses (including payments or feature access)
- Rewards/referral mechanisms
- Access to any other LGCT-based utility services.

As of 31.12.2025, the token will no longer have any functional utility within the products of Legacy Network AG.

Impact on Tokenholders

- LGCT will remain technically in circulation, but without any embedded utility, use case, or support.
- No redemption, repayment, or compensation rights exist in accordance with the terms of the Token Purchase Agreements (TPAs) governing the private sales.
- Trading availability on third-party exchanges (centralized or decentralized) is solely at the discretion of the respective trading venues or CASPs. Legacy Network AG does not provide listing support or liquidity and will not facilitate any exchange activities.

Invalidity of the MiCA Whitepaper

The MiCA whitepaper will be declared invalid as of 23.12.2025, as LGCT admission to any trading will no longer be supported. No updated or replacement version will be issued, as the token has never been admitted to trading in any trading venue with a registered seat in the European Union/EEA, and no such admission is planned. Additionally, LGCT was never offered to the public and no such offering is intended.

The Financial Market Authority of Liechtenstein (FMA) has been informed accordingly.
